# **INTRODUCTION**

Open-Close summary data are files for trading activity on the NYSE ARCA and NYSE AMERICAN exchanges. The data is available in 10-minute summary intervals or as an end-of-day summary. The files aggregates the volume by counterparty type (i.e. customer, professional customer, broker-dealer, and market maker), buying/selling and opening/closing criteria. The customer and professional customer volume are further broken down into trade size buckets (fewer than 100 contracts, 100-199 contracts, greater than 199 contracts).

The Intraday Products will launch with <u>NYSE PILLAR migration.</u>

The **End-of-Day Products** for NYSE ARCA and NYSE American will launch March 1, 2022. Historical End-of-Day data will be available from December 2018 for both NYSE ARCA and NYSE AMERICAN.
